

**AMENDMENTS TO THE SPECIFICATION**

Page 7, Line 3

On Fig. 1 ~~diagrammatically shows~~ is a schematic block diagram of the basic structure of the ~~present~~ invention.

Page 16, Lines 5-9

On Along with a planar variant construction of image multiplying matrix (IMM) (Fig. 4(a)), where light direction is perpendicular to the IMM place, there may also be a non-planar variant where the light direction is mostly perpendicular to the IMM plane (Fig. 4(b)), e.g., presented by lens raster matrix 30 where light 7, formed by the image producing mean 1, is divided into the number of components corresponding the number of lenses ~~23~~ 33.
